

ANTON SELITSKIY

Curriculum Vitae

Contact Information

Department of Electrical and Computer Engineering, Stony Brook University
Office 258A, Light Engineering Building, Stony Brook, NY 11794-2350
Email: anton.selitskiy@stonybrook.edu
Website: anton-selitskiy.github.io
ORCID: [0000-0003-2437-0922](https://orcid.org/0000-0003-2437-0922)

Appointments

Lecturer, Stony Brook University, Stony Brook (NY)	09/2026 – present
Postdoctoral Associate, University of Rochester, Rochester (NY)	06/2026 – 08/2026
Visiting Lecturer, Rochester Institute of Technology, Rochester (NY)	08/2023 – 05/2025
Senior Researcher, Russian Academy of Sciences, Moscow (Russia)	01/2012 – 06/2018
Associate Professor, Moscow Aviation Institute, Moscow (Russia)	10/2008 – 01/2012
Senior Lecturer, Moscow Aviation Institute, Moscow (Russia)	09/2007 – 08/2008
Lecturer, Moscow Aviation Institute, Moscow (Russia)	03/2004 – 06/2005

Education

University of Rochester, PhD in Electrical Engineering	2022 – 2026
University of Rochester, MSc in Electrical Engineering	2020 – 2022
Russian Academy of Music, MA in Opera Performance and Pedagogy	2008 – 2013
Lomonosov State University of Moscow, PhD in Mathematics	2004 – 2007
Moscow Aviation Institute, BSc and MSc in Applied Mathematics with distinction	1998 – 2004

Research

Topics: Machine Learning, Deep Generative Models, Optimal Transport, Functional Analysis, Stochastic Processes, Audio Signal Processing.

[Google Scholar profile](#): h-index 7.

[Full publication list](#): 1 textbook, 19 papers (8 in Q1 and Q2 journals), 21 presentations.

The paper [Fractional powers of operators corresponding to coercive problems in Lipschitz domains](#) ranks within the top 10% most cited papers in Mathematics published the same year (source: [Clarivate Essential Science Indicators](#)).

Grant Participant: RFBR 05-01-00422a, 10-01-00837, 12-01-00524a; [NSF award 1846184](#); grant from the New York State Center of Excellence in Data Science (2025, 2026).

Project Manager: RFBR 13-01-00923 and President grant 4479.2014.1 for government support of the leading scientific schools of the Russian Federation.

Awards and Scholarships

Peoples' Friendship University of Russia President's stipend in doctoral research (2013).

Stipend for courses at the Steklov Mathematical Institute of the Russian Academy of Sciences: *Blow-up theory* (S.I. Pokhozhaev) and *Advanced topics in calculus* (V.D. Anosov) (2008).

Certificate of Associate Professor at the Chair of Differential Equations awarded by the Ministry of Education of the Russian Federation (2010).

Selected Services

Editor for volumes 47, 58, and 59 of the Journal of Mathematical Sciences/Contemporary Mathematics: Fundamental Directions.

Reviewer for the Journal of Mathematical Sciences/Contemporary Mathematics: Fundamental Directions, Boundary Value Problems, Mathematical Methods in the Applied Sciences, IEEE ICASSP 2026 (Information Forensics and Security track), and NeurIPS 2026.

Organizer for the Fourth International Conference on Differential and Functional Differential Equations (Moscow, Russia, August 14–21, 2005) and the Seventh International Conference on Differential and Functional Differential Equations (Moscow, Russia, August 22–29, 2014).

Academic and Career Programming Officer at the Graduate Student Association of the University of Rochester (2023–2024).

Undergraduate/Graduate Mentoring and Project Supervision

2025:

Erick Barros: Independent Study Course Time Series Forecasting and Generative Models

Mona Anil Udesi (MS capstone): Incorporating OT in speech generation algorithms

Maitreya Kocharekar (MS capstone): Improvement of voice conversion with OT ([resulting paper on arXiv](#))

Siddhesh Dhonde (MS capstone): Image restoration with OT

Indrajeet Devale (MS capstone): Video summarization

Anushka Churi (MS capstone): Improvement of speaker verification system with KANN

Sahil Sanjay (MS capstone): Comparison of fine-tuning and RAG of LLM for table data

2024:

Fazil Pasha (MS capstone): Speaker Verification System Improvement

Shreyas Shridhar (MS capstone): Detection of Attacks on the Audio Assistants

Nithish Kumar (MS capstone): TSLA Stock Prediction Using Multiple Time Series

Kevin George (MS capstone): [Summedit: Abstractive Text Summarization For Online Discussion](#)

David Millard (3rd year student): Independent Study Course Bayesian Deep Learning. In Summer during his research internship, he applied Denoising Diffusion Probabilistic Model to speed up the numerical solution of the Euler equations that resulted in a conference paper.

2023:

Yuheng Shi (MS capstone): [Utilizing Large-Language Models for Cat Food Recommendation](#)

Teaching

ESE-561 Theory of Artificial Intelligence (2026)

ESE-670 Bayesian Deep Learning (2026)

CSCI-539 Large Language Models New course was developed (2025)

Bayesian Deep Learning Independent Study course was developed and offered (2024)

CSCI-665 Theory of Algorithms (2024)

CSCI-335 Machine Learning Complete course revised including creation of 12 homework assign-

ments instead of 4 in the previous version and a midterm (2023, 2024, 2025)

CSCI-141 Computer Science I Final project modified, a lab on dictionaries created (2023, 2024)

ECE-208/408 The Art of Machine Learning Teaching Assistant (2022)

ECE-277/477 Computer Audition Teaching Assistant (2021)

ECE-111 Introduction to Electrical Circuits Teaching Assistant (2020)

Partial Differential Equations, Calculus, Linear Algebra and Geometry (2004 – 2008)
